### Over 100.000 **Acres Covered** In the Bootheel

Twelve Pages -- Price Seven Cents

KENNETT, Mo. (A) - Cropdestroying water covered 100,000 acres in southeast Missouri's Bootheel and two Arkansas counties today for the third straight day.

Thirteen-year-old Robert Bell drowned Sunday while swimming with two cousins in the flood-swollen little river near his home at Salcedo, just west of Sikeston in southwest Missouri. The body was

not recovered immediately. In southeast Missouri alone, damage to cotton, corn, soybeans at more than 15 million dollars Cotton-the life blood of the Bootheel-was especially hard hit.

The major flood damage in Missouri was in Pemiscot and Funklin counties but seven southeast Missouri counties suffered from swollen drainage ditches in the Little River basin.

Five large ditches meet in the Dunklin-Pemiscot area and empty into Big Lake immediately to the

# Phillips 66 Announces a New Higher Performance FUTE-FUEL

Now Phillips 66 brings you its new FLITE-FUEL with the higher octane and higher power you need to get peak performance out of any car. Not only new cars, but older cars, too, will benefit from the remarkable performance qualities of this higher-powered FLITE-FUEL. It's blended for local driving conditions. It's the only gasoline containing added Di-isopropyl. It has extra high octane for smoothness and long mileage. It's clean burning, so it needs no anti-fouling additive. Fill up with new FLITE-FUEL at your Phillips 66

How to leave your family

### a Deed instead of a Debt

Whether you are already paying on a mortgage or just undertaking the purchase of a home, there is an important question which you should face: would your wife and children have a home "free and clear" if something should happen to you?

The answer to this question is as near as your phone. Your Metropolitan Representative can work out a specific solution to fit your needs and your income.

For instance, a Metropolitan Mortgage Term Plan is designed to cover the usual type of home mortgage which decreases each year as payments on the principal are

210 West 7th Street

1 Madison Avenue

made. The face amount of the Mortgage Term Plan decreases in the same proportion, so that your level premium is relatively inexpensive. A more satisfactory plan for many men

is a Metropolitan Whole Life Policy. This is permanent insurance which not only assures that funds will be available for payment of the mortgage in the event of death, but also builds cash and loan values which may be used to take care of mortgage payments in the event of illness or emergency. Because the face value does not decrease, it can be used for continuing protection for you and your family after

Sedalia, Missouri

the mortgage is paid off.

Whatever plan your Metropolitan Representative suggests, you can be sure that it will be specifically designed to meet your present and future needs.

We suggest that you call him today

and let him help you set the wheels in motion to help protect the continued ownership of your home by your family. He will welcome the opportunity to show that . . .

or read of the need for protecting and maintaining "the institution of the family farm." Politicians roll this off their tongues today as smoothly as they used to kiss babies.

Of course there are various schools of thought about how these family farms should be maintained. Take for instance the opinion of Roger Fleming, secretarytreasurer of the American Farm Bureau Federation, who recently expressed it this-wise: "Ill conceived programs allegedly designed to protect the small family farmer constitute the most dan- itself." gerous threat to family farmers. So far as I am concerned the greatest threat, other than atheistic Communism itself, to the commercial family farm is what I refer to as the 'politics of equal shares.' It is the process through which the power of government is used to distribute the right to produce politically on the basis of one share, one vote."

Fleming attempts to illustrate a fundagovernment farm program. Not all will agree with him by any means, especially when they notice other segments of the population keeping their hands in Uncle have grown even more than political.

Every now and then we hear about Sam's pocket, and see his largess dispensed all around the world.

But by their very nature these farm programs must in large measure be political, based upon all manner of political compromise and political considerations. In the opinion of many they almost always lead to greater political power over agriculture and the farmer. Fleming makes a further point by declaring: "Centralization of power, whereever it occurs, as a general rule is inconsistent with individual liberty, individual responsibility, and human freedom

Millions are against centralization of power, but few do much about discour-

The family farm is supposed to have developed and flourished under the free market system. The family farms' principal sources of cash income are from products which move in a free market, such as live stock.

These farmers have the biggest kind mental weakness, and danger, in any of stake in keeping that kind of market alive and vigorous.

But they'll have tough going resisting the pressures against it, pressures which

### Sighs of Relief Over Humphrey Exit

By DREW PEARSON

WASHINGTON - It isn't being talked about for quotation but some members of the President's official family are having a big sigh of relief at the exit of the most powerful member of the Cabinet, Secretary of the Treasury George Humphrey. There are three reasons for their sighs:

statement about the budget causing a depression that "will make your hair curl" who started all of Ike's present budget troubles. No President in recent years has had so much trouble so soon after a sweeping electoral victory as that stirred up by Humphrey over the budget.

2. Humphrey's tight-money policy has raised interest rates so high that the government has trouble floating its own bonds. Though hailed as a master financier, Humphrey has permitted the Treasury to degenerate to a point where it is now offering government bonds at the highest rate in modern American history.

3. Democratic Congressmen have been considering the possibility of starting impeachment proceedings against Humphrey on the charge that he has one of the greatest conflicts of

Congressman James Roosevelt of California revealed something of this over the weekend when he described Humphrey as "a very potentially dangerous influence.'

"I think if something isn't done about it, and the country isn't told about it," continued Roosevelt, "we may have a repetition of what

we had under Andrew Mellon.' "In the form of a depression?" Roosevelt was

"Exactly," was the reply.

Humphrey's Conflicts Asked for specific examples of Secretary Humphrey's errors, Roosevelt pointed out that Humphrey had refused to sell his stock in the giant M. A. Hanna Co. Roosevelt then cited a nickel contract signed by Humphrey's son in Oregon just a few days before his father took the oath as Secretary of the Treasury, by which contract the government built a plant with the taxpayers' money, then turned it over absolutely free to the Hanna Company.

"They were guaranteed a profit. They took no risk, and yet a few days later this individual became Secretary of the Treasury," said the Congressman from California.

He also cited the Arabian-American Oil Company, owned in part by Standard Oil of New Jersey, which in turn is partly owned by Humph-

"That company, Aramco, used to pay taxes in the United States,' said Roosevelt. "Then it worked out a phony deal with the King of Saudi Arabia whereby instead of royalties to him, they pay taxes to him. And now whereas this company used to pay millions of dollars in taxes to the United States government, in recent years it hasn't paid a penny in taxes. The King of Saudi Arabia is getting it, and the taxpayer of the United States is being de

built before 1949.

THE NEW ORLEANS TIMES PICAYUNE: Look On The Junk Pile. To learn the extent of American prosperity, go to the junk pile. That seems to be the crux of a "wire" story which says that passenger autos are being scrapped now at a faster pace than they were being

The story relates that a whopping 4 million cars are expected to be scrapped this year. As each auto goes to the heap, presumably

the stage is set for the sale of a new car. It is noteworthy in the scrappage picture to consider the far greater life of cars now being built. Figures on the life of a car over the years show the average 1925 model had a life mileage of 25,000 while the 1952 car has a life mileage of 125,000. Of all cars registered, 11.5 per cent are over 14 years old. In 1941, only 1.9 per cent attained that age.

Even so, there are respects in which the auto is unlikely to surpass the horse, of horse and buggy renown. Back in the preautomobile days, it was nothing unusual for old Dobbin to serve the family for fourteen years or better. And if he ran out of oats, he rarely got balky and needed to be primed - not, at any rate, if he toward home when that situation arose. The lack of fuel paradoxically accelerated his pace.

aging the trend.

"Did Mr. Humphrey ok that arrangement?"

Roosevelt was asked. "Not only did he ok it, it was reviewed in the Treasury department which he heads," re-Humphrey's Competitor "Another case is that of his great competitor, Cyrus Eaton," continued Roosevelt. "Both he and Humphrey own properties up in Canada. 1. It was Humphrey with his unprecedented But in that case, the Treasury sued Cyrus

Danger of Fall-Out

They may not make headlines, but perhaps the most important Congressional hearings in Washington are due to open this week under Congressman Chet Holifield of California. He is probing the effect of hydrogen and atomic bomb tests on the human race.

At present, there's a rumbling from people in Nevada against the A-bomb tests, and Holifield will try to ascertain whether this rumble is justified. But on a broader field, he will probe the following findings of the National Academy

-There's no danger to people alive today (except possibly in Nevada). The danger involves the genetic effect on future generations, plus the direct effects of radiation if bomb testing should increase greatly.

-As far as heredity is concerned, there is no safe minimum amount of radiation which humans can endure. Scientists believe that every single roentgen of radiation causes mutations. It's simply a question of how many mutations

-Scientists strongly suspect that, as radiation goes up, life expectancy goes down.

-Fall-out contaminates food by getting absorbed by plants and animals. There's no danger yet (except maybe in Nevada). But nobody knows how much of this human beings can stand. Strontium 90 is the worst culprit. It seeks the bones, where it stays for years, harboring its radioactivity. And Strontium 90 has been found in milk thousands of miles from testing sites. -Most scientists agree that the medical use of X-rays should be reduced, also that luminous watch dials should be abolished, in fact all needless exposure to radioactivity during one's life-

-The National Academy of Sciences recommended that the U.S. improve its monitoring of fall-out, step up its genetics research, and also step up research on biological processes.

### Constructive Atom

Recently the army dedicated a small plant at Fort Belvoir, Virginia, which put into operation the first of a family of small atomic reactors that could bring light to isolated outposts in the Arctic or to cities devastated by war. Part of the demonstration where the switch was pulled by Wilber M. Brucker, Secretary of the Army and Lewis L. Straus, chairman of the Atomic Energy Commission, was the surge of electricity which powered a radar antenna and a printing press.

Another constructive use of the atom was recently demonstrated in Los Angeles when a small "atom smasher" was used in the treatment of deep cancer. All traces of malignancy disappeared in 48 out of 74 patients treated for over a year. Doctors estimate that 5 to 10 years of freedom from the disease would con-

The treatment is similar to that used by the conventional Xray machine except that it penetrates more deeply.

Thought for Today He that is greedy of gain troubleth his own house; but he that hateth gifts shall live.

-Prov. 15:27.

Highway Patrol Hidden Pay Brings Senate Wrath Old fogeys never die and that's

why the state senate said no recently to a house-passed pay increase for the state highway

The senate passed a bill providing for 100 additional troopers but when senators got the full story on the highway patrol's fogey system, additional pay for the troopers was chopped from the bill.

Fogeys, in patrol parlance, are periodic 10 per cent pay increases for every five years of service. Patrolmen with as much as 20 years service thus get 40 per cent more pay than their base salary. The fogey system has been in effect since 1931. However, the patrol salaries listed in the Blue Book have always been base salaries with the fogey increases not men-

One senator said the fogey plan was why the senate turned down a patrol pay increase approved by the house. This senator, who said he was in too many controversies already to be identified, said the senate decided it was time to call a temporary halt to further pay increases for the patrol.

The patrol received a pay increase of \$75 a month for each trooper in 1955 as well as a retirement system which permits retirement at 55.

The senator noted that besides base pay, patrolmen receive their fogeys for service, plus \$180 a year for uniforms and around \$720 for meals. He said most senators feel that the uniform and meal allowances should also be counted as

The pay increase proposed by the house would have been \$50 a month for troopers, \$75 for sergeants, \$100 for lieutenants and captains, \$125 for majors and \$150 month for the superintendent. Several senators said a pay raise might be justified for the ranks of trooper, sergeant and lieutenant. but they drew the line at more money for the upper ranks.

Not Highway Department-Rozier Sen. Leo Rozier (R-Perryville)

Truck Interests Kill Road Report

ment study of the allocation of highway costs was ignored in considering the bill. He said trucking interests much much of the fact that the report has not been approved by the highway commis-

"The report hasn't been refuted either," Rozier noted. The report shows that passenger cars and pickup trucks are paying \$5,486,632 more than their share for highway building while big trucks are paying \$4,460,318 less than they

"It's the only available study by an independent source on who's paying for the highways," Rozier said. "If the senate can't depend on a report from our own highway department," he added, "who can we depend on.'

Besides passing the bill increasing the length of trucks by five feet and the weight by four tons, the senate passed a proposal to require the biggest trucks to pay \$100 extra a year license. But Rozier said the increased length bill shouldn't have been passed without sweeping increases in truck li-

The two bills are before the house and are expected to be disposed of in the final week of the

Safe and Sane Fourth of July Is Object of House Bill

July 4, 1958, may be a quieter occasion in Missouri, thanks to a bill which recently cleared the general assembly and is waiting the approval of the governor. The bill prohibits the sale of

high explosive fireworks in Missouri such as cherry bombs, cannon crackers and giant skyrockets. permits the sale of common fireworks which are listed as safe by the Interstate Commerce Commission. Such fireworks include roman candles, fire fountains. sparklers and firecrackers not over one and one-half inches long or over one-quarter inch in

The bill could not become effective before Aug. 29 this year and thus the prohibition's first effect will be felt in 1958. The proposal came in for some explosive debate when it cleared

the house last week. Rep. Joe can't understand why the state Kielholz (D-Osage County) hit the senate refused to accept a high- nail on the head when he summed way department study which up the supporters' views - "We shows that big trucks don't pay just want to save all the fingers opposed the bill because it detheir share for using the highways. of little children that we can." Rozier said a highway depart. Others such as Representatives ties we had when we were kids."

more guts. The AFL-CIO did not begin its

investigation of Beck's Teamsters, biggest union of all, until the Senate committee's revelations made such an investigation inescapably

If a Senate committee was needed to tell the AFL-CIO what was delivered the baccalaureate sergoing on in Beck's union, what reason is there to believe it will be any more perceptive or active But unionists play politics against some other big union until

> on the AFL-CIO to show it means a brief, visit with home folks. business permanently when it asserts through a series of wellsounding statements, its determination to do its own police work. The key instrument in the AFL-CIO constitution for ferreting out

corrupt or undemocratic practices in its union is the Executive Council. This council is composed of top officials from the member unions, which have traditionally resented outside prying into their affairs.

It is the real power in the AFL-

The constitution says this council, when requested to do so by President George Meany, or any council member, can investigate corruption or bad practices in a member union.

In addition, it can hold hearings and order a union's suspension. Only the annual convention can

vote to expel. But in a resolution which it adopted in January the council pointed out one serious limitation on its ability to bring corruption

The AFL-CIO does not have subpoena power. Legislative committees and law enforcement agencies, which do have such power, can compel the appearance of witnesses and production of records under penalty of punishment for refusing.

Last week the council fired Beck from its list of vice presidents. It also suspended the small Laundry Workers Union and gave two other small unions, the Industrial and Distillery Workers, a choice between suspension and probation.

A Senate committee exposed welfare fund abuses in those two unions two years ago and the council was not satisfied with their efforts to clean up. Last week's action was the strongest taken by the AFL-CIO since its merger two years ago.

### 3-Year-Old Disrupts Routine of City

SHIMONOSEKI, Japan (A) - A 3-year-old Japanese boy took a drink of water today and tied up a fire brigade, an ambulance corps and the city water works for 20 hectic minutes.

Shigeyoshi Kawashima got his tongue stuck in the faucet when he tried to suck a drink from a public fountain. After the rescue crews had un-

fastened the faucet and sent the boy to a doctor, a water works official explained that the water pressure sometimes causes a suction when the tap is turned on. To be on the safe side, you have to wait for the water to spout out, and Sigeyoshi didn't wait.

San Bernardino County, in California, is 20,160 square miles in area and is the largest county in the United States.

### Will Present Case For Presidential Veto

WASHINGTON (A)-Two of President Eisenhower's top fiscal officers set out today on a rugged assignment: Trying to persuade Congress to strengthen the President's veto power over money

Like many presidents before him, Eisenhower wants authority to veto selected items in an appropriation bill without rejecting

Secretary of the Treasury Humphrey and Budget Director Per- the dest ying. cival F. Brundage were designated to present the administration's case to a House Judiciary subcommittee considering a proposed constitutional amendment to authorize the item veto.

Like brown gravy? Be sure to brown the flour before it is used

The American tulip industry, though young, produces about 12,-347,000 bulbs annually.

By MRS. MURIEL LAWRENCE abreast of him, he had nearly fin-Marvin's mother came out of the ished eating it. Resignedly she said. "O.K. You'll get it some day, you'll

She was right. Some day, Marvin may indeed get it.

But it won't be his fault. It will be the fault of bad training-discipline by threat of disaster. For years, he's been hounded by warnings like these:

"Stop fooling with that gas jetor you'll blow the house up.

"Come out of that puddle or you'll catch your death of cold. "Stop leaning out that window or you'll break your neck.

An interprising child, Marvin long since discovered that disobeying these demands did not result in the threatened explosion, pneumonia, broken bones. Gradually, he transferred trust of his mother's experience with reality to his own limited experience of it-and to act on his belief that he could

get away with anything. This is a pity. Sooner or later The Rev. A. W. Kokendoffer, a policeman does become the consequence of stealing other people's property. When the threat Marvin believes empty becomes real, his sense of angry betrayal can turn him into a delinquent child.

As disasters are not always the consequence of children's misbehavior, we are mistaken to suggest they are. All we gain by our unrealistic threats is their contempt for realistic danger.

We invoke disasters to make them do as we wish we have so little respect for what we wish.

Had Marvin's mother respect for her own wishes, she'd never have mentioned a punishing policeman to him. Her own desire to see that tangerine replaced would have been more important than any policeman's desire to see it replaced.

When we ourselves feel no respect for our wishes, children lose , too. It's only then that we have to delegate control of them to disasters-to punishing outside agencies like policemen, germs and

By Robert Dieffenbacher, D. D. How deep is the sea? Perhaps a mile or 20,000 leagues. Possibly it is only as deep as a man or a rock or a fathom. The depth of the ocean is less important than its turbulence, its currents and its hidden dangers.

The surface may be blue or green in color. It may be clear or foamy crested white. It may be full of seaweed or it may be alive with sharks or squids. From the depths of the ocean come food and chemicals. Life and death exist in its bosom. The sea is mysterious and fearful, yet beautiful and powerful.

Man cannot tame the sea nor can he be its master. He fears it as he snatches treasure from its recesses. He travels over its surface and finds himself lured 1) its challenging song. God alone is the master of the

sea. He is mysterious, powerful and to be feared. Yet God differs from the sea in being a spirit, loving, forgiving and saving rather

ing alfalfa tour May 14. At the extreme left is Clarance Lyman, extension soils specialist from Hawaii, while at the right, with his back to the camera, is Joe Klein of near Bahner, on whose farm

When this picture was taken the group were examining a field of alfalfa at Bob and Rudy Brauer's. The alfalfa in the foreground was real yellow in color and quite thin in stand while that in the background had a dark green color and had made a fine growth. Actually there was about an acre of good alfalfa in a round spot in the center of a 3-acre field.

The Brauers could not explain the cause of the difference as the entire field had been limed and rock phosphated. However, a quick soil test made in both areas indicated adequate lime and phosphate in the dark green area and a serious shortage of both in the yellow area. (Extension photo)

# Now-see camera-eye proof Dodge trucks lead the low-priced 3!

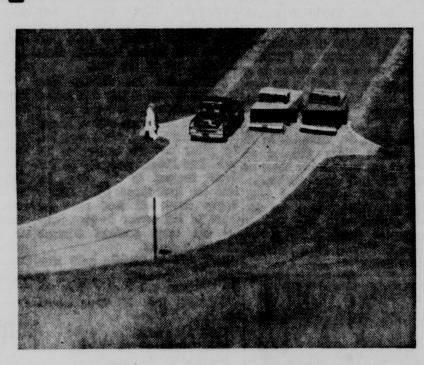

Actual road tests . : . like the one photographed at the right . . . prove beyond question that Dodge Power Giants outclass all competition. This rugged hill climb is just one of a whole string of tests comparing all three low-priced trucks.

See certified test results of the entire series -actual unretouched photographs--at your own local Dodge dealer's. These tests, plus 15 minutes behind the wheel, will demonstrate to you that today's Dodge Power Giants lead the low-priced three in every measure by which you judge a truck.

You get the most V-8 power of the lowpriced three . . . up to 232 horsepower. This gives you snappier performance to save valuable trip time . . . extra power to take steep climbs with less engine strain. And Dodge gives you extra payload capacity, too. For instance, the test pick-up shown hauls as much as 27% more than the other two low-priced makes.

Check today's low Dodge prices. You'll find eleven Power Giant models, in the lowtonnage field alone, that are actually the lowest priced of the low-priced three. Why not see for yourself? Your dealer will gladly bring a Dodge right to your door.

THEY'RE OFF! Here's the start of a grueling hill-climb test. All three low-priced trucks were lined up at the bottom of a test grade equal to the steepest hill in San Francisco. At flag drop, test drivers floor gas pedals ... the Dodge Power Giant leaps out in front.

DODGE THE WINNER BY FIVE LENGTHS-and still gaining! The Dodge Power Giant outdistanced both truck "C" and truck "F" from the start. This is just one of a complete series of actual road tests that prove Dodge the outstanding leader of the low-priced three.

# To 3rd Place

What happened to Milwaukee's vaunted pitching staff?

Manager Fred Haney hasn't seen starter go nine innings since May 12. In the last five games, he has used 18 pitchers.

Even the lowly Chicago Cubs roughed up the Braves over the weekend, taking three out of four, including a sweep of a Sunday double-header that dumped Milwaukee into third place.

The Braves have had only 10 complete games all season, the same as Cincinnati, which was supposed to have no pitching staff

Dick Drott, 20-year-old rookie who wasn't even on the Cubs' roster in spring training, set a club record yesterday by striking out 15 Braves for a 7-5 decision in the first game, while Gene Conley failed Haney.

Juan Pizarro, a hot shot freshman, held the Cubs to four hits in eight innings of the second game but was knocked out in the ninth during a two-run rally that gave Chicago a 5-4 edge.

Cincinnati even got an eighthinning home run from its pitcher, Hal Jeffcoat, in beating St. Louis 7-6. The Cardinals got a pair of homers from Stan Musial, including his eighth grand slam.

man, who said the evangelist would have no comment.

### Movie Starlet Denies Plans to Wed Presley

HOLLYWOOD (A) - Movie starlet Yvonne Lime says published reports that she plans to marry Elvis Presley in Mexico this week have left her "all shook up."

"We are friends, but there is nothing to the story," the 20-yearold blonde said yesterday. She has been dating Presley regularly since last February after appearing with him in the picture "Loving You."

The marriage report, published in a Mexico City newspaper, was denied earlier by a spokesman for the rock 'n' roll singer. How about their marrying sometime in the near future? Miss Lime replied with a smile: "It's

### Dies After Beating By Teenage Son

a secret."

MAYWOOD, Calif. A - Police say Harold Johnson died of a billy club beating by his 15-yearold son.

Johnson, 43, succumbed yesterday a few hours after he demanded-and obtained-the release of his son Lester from jail. The boy had been booked on suspicion of assault with a deadly weapon.

Police said the son told them he attacked his father during an argument in the family's home in Maywood, a suburb of Los Angeles, Saturday night. He was rebooked on suspicion of murder

### Hunch Pays \$2,000

PHILADELPHIA (A) - Milton Fleishman, 27, had a \$2,000 hunch and it paid off. He bet his wife would have twins.

Last January, Fleishman and his wife Dolores realized they were due for an addition to the family, at that time made up of 3-year-old Eric. Fleishman placed an insurance policy with Lloyd's of London. Under the agreement, the Fleishmans would get \$2,000 if they had twins.

Last Sunday, along came Holly Beth and Hope Susan, a pair of girls. Lloyd's is processing the policy now.

### Not Enough Years

ALLENTOWN, Pa. (P) - Policeman Ralph Jones said he approached a group of boys to find out if any of them had turned in a false fire alarm. He said that when he asked a

5-year-old if he had turned in the alarm, the boy replied: "No sir. I'm too small to reach the lever. Maybe next year."

D. G. Monsees, of Route 2, Se- six tails. dalia, chairman of the State USDA Disaster Committee, announced today that the survey teams now making a study of rural disaster areas in Missouri will report to the committee Monday with recommendations on asking President Eisenhower for diaster relief.

Monsees stated that teams are at present conducting extensive surveys in Jackson County, in ten counties in the Missouri "bootheel" section, and in the tornado swept area of south central and southwestern Missouri.

They will determine the extent of the damage to homes, crops, and equipment for report to the committee at Columbia Monday. Monsees said that if damage is

as severe as reported, he feels sure the State USDA Disaster Committee will recommend for the Governor's certification to the President a request that Missouri be made eligible for disaster re-
